

SHIVAM SINGH

INVESTMENT RESEARCH | PRIVATE EQUITY / GROWTH INVESTING | PORTFOLIO STRATEGY | CAPITAL ALLOCATION
San Francisco, CA | shiv-investments@umich.edu | +1 (202) 630-3211 | [linkedin.com/in/beastofbayarea](https://www.linkedin.com/in/beastofbayarea)

EXECUTIVE SUMMARY

Investment and **portfolio**-strategy leader with experience across AI, FinTech, institutional asset management and **commercial diligence**. Combines **underwriting**, market and competitive research, **valuation** logic, **scenario analysis**, **portfolio-risk** infrastructure, **LP** communication and **investment**-committee decision support. Brings **investment underwriting**, **portfolio monitoring**, **value creation**, **downside** analysis, **LP** relations and capital-allocation governance across private and institutional contexts.

EDUCATION

University of Michigan, Stephen M. Ross School of Business - MBA, Strategy, Technology & Operations | 2022 - 2024 | Wolverine Venture Fund | Zell Lurie Institute

London School of Economics and Political Science - Executive Coursework, Economics, Markets & Public Policy | 2024

Indian Institute of Technology - B.Tech, Computer Science & Engineering | 2010 - 2014

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) - AI Investments

2024 - Present | San Francisco, CA

Principal, Investment Analysis & Portfolio Strategy

- **Underwrote** an agentic-AI **investment** using bottom-up market sizing, **\$100M+** GMV sensitivity analysis and ROI modeling; built **scenario** and tornado cases, tested unit economics and secured **\$5M** funding against competing internal **portfolio** bets.
- Led an **\$85M** buy-vs-build review spanning strategic fit, technical **diligence**, integration **risk** and post-close economics; tested **valuation** logic, operating assumptions and deal rationale for **investment**-committee materials.
- Built the post-deal **value-creation** plan around compute economics, tooling consolidation and infrastructure migration, improving gross margin **55% to 81%** while strengthening platform scalability.
- Developed sector theses across GenAI, enterprise software, data infrastructure and model economics; assessed **TAM**, competitive moat, monetization, technology **risk**, scalability and **return potential** while gating follow-on capital to milestones.
- Structured transaction and post-close economics around integration sequencing, tooling consolidation and ROFR/ROFN protections, connecting deal terms and strategic control to long-term platform optionality and **return potential**.

Rakuten Group, Inc. - Corporate Finance

2023 | Tokyo, Japan

Investment Diligence - MBA Intern

- Evaluated **investments** and partnerships across payments, commerce and AI using market mapping, commercial **diligence**, take-rate analysis and unit economics for a platform spanning **70+** business units / **50K+** merchants.
- Stress-tested a **\$50M** DTC expansion with a **10,000**-iteration Monte Carlo model of CAC, churn, retention and payback; quantified **downside risk** and supported capital reallocation that avoided an estimated **~\$20M** loss.
- Redirected capital to a partnership-led model that improved CAC **~80%**, LTV:CAC **0.8x to 4.5x**, D30 retention **34% to 67%** and payback **18 to 4** months.
- **Underwrote** an AI platform spanning **70+** business units and **50,000+** merchants, assessing build-vs-partner economics, inference cost, monetization, workflow value, strategic partnerships, adoption and data moat as drivers of scalability and **investment** attractiveness.
- Used cross-device attribution and merchant-performance data to improve post-**investment** operating visibility, connecting customer acquisition, conversion and transaction economics to capital-allocation choices across partnership, build and **investment** alternatives.

The D. E. Shaw Group - Capital Formation

2018 - 2022 | New York, NY & Hyderabad, India

Vice President, Institutional Portfolio Analytics

- Originated and closed a **\$500M** institutional mandate, leading **LP** sourcing, strategy positioning, **diligence**, investor education, technical-**risk** defense and final **investment**-committee negotiation.
- Structured a performance-aligned fee model generating **~\$25M** in Year-1 performance fees, translating **alpha** decay, drawdown controls and **portfolio risk** into decision-ready materials for institutional allocators.
- Built real-time **portfolio-risk** infrastructure under Basel III, cutting latency **90ms to 4.2ms**, false positives **15% to 1.8%**, saving **~\$400K/month** and unlocking **~\$85M** regulatory capital.
- Led an earnings-data platform with **>98%** automated-processing confidence, reducing ingestion from hours to seconds at **~70%** lower cost and improving research timeliness and data quality.
- Managed **~\$10M** capex and cross-functional **investment** governance across trading, quant, compliance, finance and technology, using shadow validation, drift testing, explainable-**risk** logs and dashboards to support high-stakes go/no-go capital decisions.
- Built a unified deal-data and **diligence** repository in a **72-hour** sprint, reducing consolidation **48 to 6** hours and improving **investment**-team access to decision-grade information; the faster **diligence** workflow helped close a **\$25M** Series B one week ahead of competitors.
- Strengthened **portfolio** governance and **LP** reporting through quarterly reviews, written **investment** memos, pre-registered success criteria and cross-functional **diligence**, improving auditability of assumptions, **risk** controls and capital-deployment decisions.

McKinsey & Company - Capital Strategy

2014 - 2018 | London, UK

Associate, Investor Due Diligence

- Served private-equity, FinTech, retail and financial-services clients on commercial due **diligence**, market entry and **investment** strategy, building models supporting **\$50M+** executive **investment** and **portfolio** decisions.
- Conducted **TAM** sizing, customer segmentation, competitive positioning and **downside**-case analysis; hindcasting models delivered **~95%** forecast accuracy on key operating assumptions.
- Designed elasticity-based pricing using regression and difference-in-differences, identifying a **\$50M** revenue opportunity while cutting analytical cycles **6 weeks to <1 week**.
- Restructured institutional digital-asset pricing using maker-taker tiers and contribution-margin modeling; supported volume growth **\$215B to \$371B** and recurring revenue **\$45M to \$213M**.
- Built the **investment** case for a Southeast Asian digital bank across market sizing, credit-model **risk**, regulatory feasibility and acquisition economics, then aligned regulatory-sandbox and GTM strategy as the platform scaled to **100K** active users in **90** days.
- Advised executives on **\$100M+** capital-allocation decisions, synthesizing market, regulatory, operating and technology **risk** into board-ready **investment** theses, **scenario** cases, **downside** analysis and decision narratives for high-stakes **portfolio** choices.
